

# Release Notes

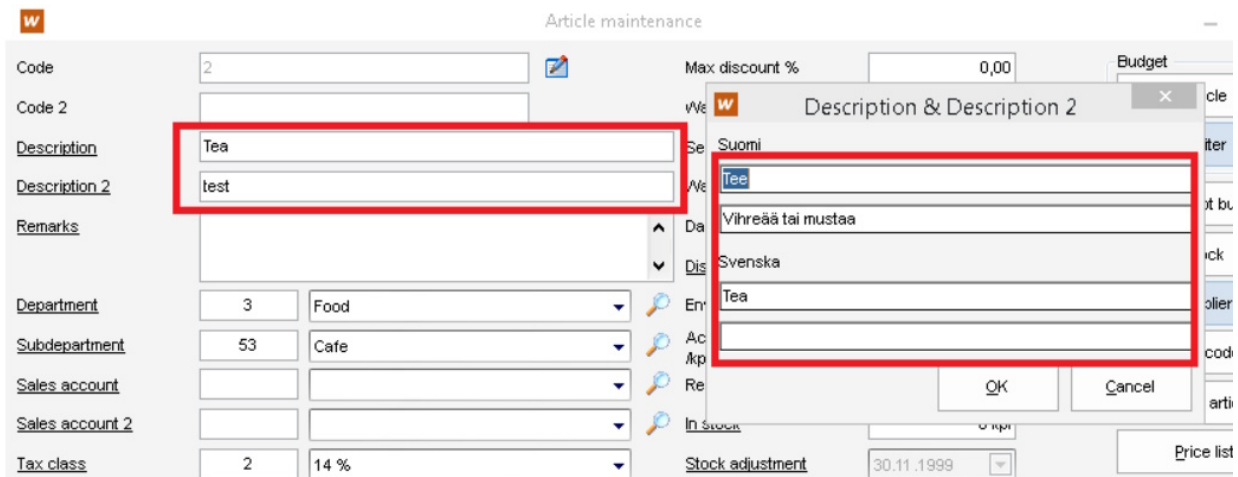

## Winpos Mega - Version 1043 SP5 Release

07 June 2023

### Issues Fixed

#### Critical and Severe Issues fixed:

- **Backoffice (Article maintenance):** Non-visible characters are no longer accepted in Article maintenance (Back-office - Maintenance - Articles) in the Description, Description2 and Language field. For example, this could occur when copying description from a PDF or Excel file. (#7779)

- **Deposit (bottle) functionality:** Fixed issues with the Deposit article function:
  - Recipe article triggering deposit articles - not working in certain cases.
  - When using EAN code, issues with being able to delete the main or deposit article from the basket.
  - Price check function showing deposit article price, not the main article price.
  - Wrong data shown on the customer display with specific articles.

(#7744)

- **Export (SaleAccountSAPTable):** Fixed issues with the export of SaleAccountSAPTable. (#7804)
- **Peripherals (Slip printer):** Fixed an issue with *Parameters - Peripherals - Slip printer - Use small font* where selecting this caused *Function button 24 - Print guest check* to print some recipe articles incorrectly on the receipt printer. (#7791)
- **POS (REG) - Campaigns:** On start up, REG now deactivates campaigns that are not valid for the current terminal. (#7776)

- **Reports (Report 114 - Payment export):** Issues fixed:
  - The report no longer generates a SELECT error.
  - Corrected the format of some fields.(#7765)
- **Reports (Report 121 - Electronic journal/Report 118 - Electronic Journal - Articles):**
  - Both reports now work again.
  - Added support for choosing Profit center and Stock selection.(#7764)
- **Reports (Gift voucher report (Mega2 Report 124)):** Has been re-added to **Mega3** as **Report ID 2124**. (#7746)
- **Reports (Report 191 - Dispenser Transactions):** Fixed an issue so that the report no longer generates an SQL error when making Profit center selection. (#7788)
- **Reports (Report 2014 - Shop Special):** Fixed issues which stopped this report from working correctly. (#7762)
- **Reports (Maksutarra report (Mega2 Report 2017)):** Has been re-added to **Mega3** as **Report ID 2125** (#7763)
- **Stock:** An issue has been fixed with the data update to ExChangeHeadOfficeTable that caused data in some cases to be missing from Stock tables:
  - StockPluTable
  - StockEanTable
  - StockCenterTable(#6301 & #7796)

**Other Issues fixed:**

- **POS (REG):** To improve performance in sales entry/processing in certain cases, ConsolidationPluTable records that are not valid\* for the terminal are now removed by the POS (REG) during start up.  
(\*For example, where the Stock location does not exist for the Terminal).
