

Release Notes

Winpos Mega - Version 1043 SP6 Release

19 June 2023

Issues Fixed

Critical and Severe Issues fixed:

- **POS (REG):** Fixed an issue so that parameter *Article.Skip ean check* will work with scan flags with 8-digit codes. (#7783)
- **POS (REG) Declaration:** Fixed an issue so that when multiple terminals are run from one DB, REG does not complain about open tables or receipts when starting a declaration. Note: this issue affected ALL terminals which were run from the one DB, even if it was only one terminal that had open receipts or tables. (#7820)
- **Reports (Report 2014 - Shop Special):** Added missing column titles in Payment Methods section of the report. (#7762)
