Winpos Mobile:

Issues Fixed

Critical and Severe Issues fixed

Enhancements & Changes

Added support for ITAB light tower (for self-service kiosk) (#497)

ITAB light tower is now supported for self-service kiosk.

This is configured using the following existing Parameter > Settings with these values:

```
Self service.Signal Tower = ITAB
```

```
Signal Tower serial port = 'port used by ITAB device' e.g. 'COM5'
```

Winpos Mobile:

- LAN installer now available.
 - Added new parameter into Winpos.INI [Database] section to support POSServiceAPI.
 - The 'Show QR' code button is now usable from *Parameters > Settings > Mobile App* on client.
 - Settings under *Parameters > Locally controlled* are now editable on client.
 - Fixed issues preventing install of Winpos Mobile on bClient. (#7947)
-

Issues Fixed

Critical and Severe Issues fixed

- **EcEle:** Fixed a rounding issue in EcEle. (#7839)
- **Invoices:** Fixed an issue relating to VAT calculation (Totalamtvat0). (#7875)
- **Self-service:** Fixed a bug where changing the button layout in the kiosk caused all the pictures to be loaded again. (#7900)
- **Self-service:** Fixed an issue where self-service kiosk would incorrectly ask to renew an expired password. This occurred when existing parameter settings *Reg.Login with password = False* and *Public.Advanced Security Enabled = Normal*. (#7906)
- **Stock:**
 - The StockPluTable is now populated when an Article is published.
 - Stock quantity is now transferred when carrying out quick changes to the stock quantity in Article maintenance, without needing to save the Article first.(#7896)
- **Stock:** When creating a new stock location, the StockPluTable and Stock EanTable are now populated, even if the "Check all stock locations" checkbox is not checked. (#7946)
