Enhancements and Changes

New integration to Planet Payment's payment solution

- Pay at Counter integration with Winpos standard POS and Planet Payment using the PAX A35 terminal is now available.
- Installation/configuration documentation is available separately.

NOTE: An integration with Winpos Mobile and Planet's all-in-one payment solution using the PAX A920 terminal is coming in early 2024.

Issues Fixed

Critical and Severe Issues fixed

- **POS (Guest Check/Tables):** Fixed an issue where chair numbers were shown on the table map in POS. (#7977)
- **POS (Guest Check/Tables):** Fixed an issue where open tables were not displayed for all users if existing parameter *Guest check.Show only own orders = True*. (#7977)
- **POS (Guest Check/Tables):** An issue has been fixed with deletion of Guest check (Table) rows and multiple POS clients which could cause deadlocks. (#7995)
- **Self-service:** A bug has been fixed where changing quantity in the payment phase using the 'plus/minus' buttons would cause issues with the Tax Class used in the transaction. (#7852)
- **Swedish fiscal:** Fixed an issue with Mega which meant that the Swedish control-box fiscal solution did not work with Winpos Mobile. (#7972)

Card integration fixes

Nixor

- The numeric keyboard in the on-screen keyboard now scales.

Poplatek

- Added options "Show open failed dialog", "Open on cashier login", and "TCP connect timeout".
- Fixed issue with open in Async mode.
- Fixed an issue with handling failure to open Winpos.Emv3.

PointESF

- Fixed an issue with 'PEFSClient.Close' when NOT in interactive mode.
- Fixed issue with open in Async mode.

Verifone UK (Ocious)

- Added support for combined customer receipt.
- Now displays DECLINED transaction result in red text in the feedback window.

Verifone UK (OPA)

- Added support for combined customer receipt.
- Now displays DECLINED transaction result in red text in the feedback window.
- 'DECLINED' text on the receipt is now printed within a box.
