Release Notes

Winpos Mega - Version 1046 SP1 Release

## 4 March 2024

Enhancements & Changes

Price Lists - additional functionality (#2028/#2029)

**Scheduled Price List (Price Change) Functionality**

It is now possible to schedule the creation of a Price List; specifically this is possible for a Price List of type 'Price change' in the 'Create pricelist' tab.

Controls to turn on scheduling and define when it will run are on the 'Create pricelist' tab, as shown below.

(Back office > Maintenance > Pricelist maintenance > Price list (link) > Pricelist maintenance (where Type = Price Change) > Maintenance button > Create pricelist tab).

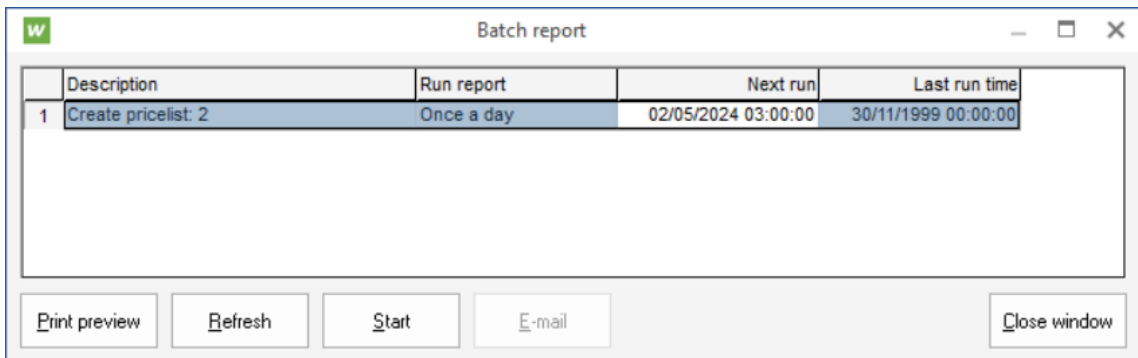

- 'Run report': This is enabled when 'Execute at scheduled times' is set. A drop-down list of periods is provided to select from. Note: This is the same period selection which is available in the standard batch reports.

- 'Time': This is enabled when 'Execute at schedule times' is set. Allows scheduled time to be be set.

- Note: If it is already set, the 'Execute at scheduled times' checkbox automatically toggles 'off' when the other related checkbox 'Automatically' is changed to 'set', and vice versa.

    - Both checkboxes cannot be 'set' at the same time.
    - Both checkboxes can be 'unset' at the same time.

- When a Price List is scheduled, it is visible in ReportMega3Gui.

  For example:

  From here, a report can be run on demand (select the report and use the 'Start' button).

- Additional information is now displayed in the 'Create pricelist' grid when the 'Net price basis' = 'Pricelist'. The information is shown in 2 additional columns:

  - Price list number

  - Price list (description)

  For example:

- Logging of updates is either to Report or Backoffice logs, depending on where the update is triggered.
- Pricelist number is now visible in the Price Change Pricelist grid settings.

Copy pricelist - Schedule editing

It is now possible to see 'Copy pricelist' tasks which have been scheduled via a new 'Task' drop-down on the 'Copy pricelist' tab.

The 'Task' dropdown shows all scheduled 'Copy pricelist' tasks. When one is selected, the details are displayed in the fields below. e.g. From, To, scheduled date and time, etc.

There is also a new option 'Delete pricelist after scheduled task'. This is controlled using a new checkbox on the 'copy pricelist' tab.

For example:

Issues Fixed

- **Back office (Article Maintenance > Price Lists)**: Improved the time taken to load the Price List window in Article Maintenance. **(#2433)**

- **Back office (Report 79 - Bookkeeping Account)**: The report now correctly uses country region settings. **(#1975)**

- **POS (REG) (Recipe price)**: Fixed an issue which meant the incorrect purchase price was calculated when removing recipe modifiers from a recipe article in the POS. Note: This only occurred if existing Parameter Setting *EcEle.Receipt article get PurchPrice from items = True*. **(#1985)**

- **Winpos Mobile**: Fixed an issue where text was not printed correctly on kitchen printers. **(#2209)**
