Release Notes

Winpos Mega - Version 1047 SP12 Release

Release Date 02 June 2025

Issues Fixed

Issues Fixed

- **Back office (Goods Received):** Added missing text files for Goods Received Types 41,42 and 43 (Return/Reclamation). **(#3113)**
- **Back office (Inventory Group):** A new Inventory Sheet with pre-added rows now counts the quantity correctly in other sheets when they are opened. **(#3398)**
- **Back office (Inventory Group):** Clicking in the counted quantity field in Inventory Sheet will no longer add a value in other fields against some articles. **(#3505)**
- **Back office (Stock Movements & Waste):** Fixed issues related to existing Parameter *Stock.Save stock list path (offline mode)*:
 - Fixed incorrect and intermittent 'Article not found' error when saving and re-opening a Waste/Stock Movement.
 - Fixed intermittent back office crash in Waste ('Run time error '13 Type mis-match').
 - Fixed issue where the Quantity field header was sometimes replaced by '0' in Stock Movements. For example, after opening a saved list while a list was already opened and the field was active. **(#3666)**
- **Fiscal (Latvian):**
 - Fixed issues with Latvian fiscal and self-service kiosk workflow. **(#3733)**
 - Fixed issue with Latvian fiscal related to printing of guest check receipts. **(#3735)**
- **Fiscal (Lithuanian):** Fixed a cash rounding issue. **(#3678)**
- **Global Blue:** Fixed issue where the latest version of Global Blue did not work with Mega (crashed). **(#3487)**

NOTE: For the Mega integration to work with the latest version of GB, as well as upgrading to this version or later, the following files must be copied from the GB installation folder into the WinposMega folder:

- GB1COM.dll
- DataTransferModels.dll

- IPC_Controllers.dll
- MemoryMappedEngine.dll
- Utilities.dll
- **Multitenancy server:** Fixed most critical security gaps. (**#3633**)
- **POS/REG:** Fixed a bug where if a campaign had "Discount not allowed" set, it was still possible to get both discount and campaign price at the same time. This led to miscalculation of VAT. (**#3733**)
- **POS/REG:** Fixed issue related to existing Parameter *REG.Recipe rows will be included in ECDataServer=True* where recipe articles with Print Info=No had an incorrect quantity on the receipt. (**#3724**)
- **POS/REG:** Fixed a bug so that selling an article, applying a discount, and then scanning a coupon to get the same article for free now no longer gives a refund. (**#3737**)
- **Pre-order :** PreOrderSvr.DLL is now included in the standard Mega update package. (**#3671**)
- **Pricelists - copy:** Copy pricelist no longer causes ReportMega3 to enter an endless loop condition. (**#3652**)
- **Self-service kiosk:** Fixed an issue with Russian language where certain selections generated an error: "SaveList error: Invalid procedure call or argument". (**#3730**)
- **Self-service kiosk:** The kiosk no longer crashes due to combinations of Match together with Article pop-up items. (**#3732**)
- **Tenant Admin tool:** Fixed issue with TenantAdmin tool so that the back-office link in Sales Dashboard now always works correctly with empty TenantID string in single-tenant installation. (Empty TenantID string is valid for single-tenant installations). (**#3698**)
