Release Notes

Winpos Mega - Version 1047 SP14 Release

Release Date 12 June 2025

Issues Fixed/Changes Made

- **EMV**: Fixed an issue with async card handling. Starting a transaction, selecting payment but then adding new articles to the basket before actually paying resulted in open transactions being created from the articles in the sales basket. NOTE: It is strongly recommended that customers using async card handling upgrade. **(#3680)**

- **Poplapay**: Fixed the Poplapay JSONPOS integration **(#2996)**

- **POS/REG**: Added a new option for existing *Parameter Receipt.Print customer info*. The new option is '**Masked number**'. When **Print customer info = Masked number**, only the last 4 number of the customer number are printed on the receipt. The remainder of the customer number is replaced with * chars. The customer name is still printed. **(#3329)**
