Enhancements & Changes

Changes to the Mews PMS integration (#3215)

Finvoice / Report 37 'Print invoice' (#3218)

Issues Fixed

Enhancements & Changes

Changes to the Mews PMS integration (#3215)

- Room number and customer name are now printed to REG receipts if existing parameter setting *Receipt.Print customer info = True*.
- The Room number and customer name are saved to JournalHeader table, description2 field.
- NOTE: If the customer is a 'paymaster' with no reservation then the information is only written to the JournalHeader; it is not output on the REG receipt.
- Added logging to assist with debugging potential issues.

Finvoice / Report 37 'Print invoice' (#3218)

Added a new output type '10 - Finvoice' to Report 37 'Print invoice'.

This resolves issues with customers using Finvoice where problems printing to physical printers also causes electronic invoices not to print out.

Now, customers that have Finvoice can be placed into the same customer group. Then invoice printing can be carried out separately for that customer group with the new 'Finvoice' output type without having physical printers involved and causing problems.

Issues Fixed

- **ORB (Order Ready Board):** ORB is now correctly updated when an order is ready. (**#3441**)
- **Pre-order (Espresso House):** Fixed an issue with calculate price function in EH pre-order. (**#3448**)
- **Self-service:** Fixed an issue with the self-service kiosk where it was possible to add or scan new articles or customer while the kiosk was showing the receipt. (**#3048**)
- **Tenant Admin (Multi-tenancy):** Fixed issues with TenantAdmin.exe when using it in single tenant mode (**#3419**):
 - Existing users are now shown (and so it is now possible to delete them).
 - Tenantadmin.ini is now being created.
 - The TenantAdmin program now creates users correctly.
- **WCI (Tallink):** Fixed an issue where old (no longer used) setting *Self service.Customer balance payment = No* caused issued with VIP payment in Tallink's WCI. (**#3168**)
