Release Notes

Winpos Mega - Version 1047 SP8 Release

27 February 2025

Enhancements & Changes

Worldline EMV Integration (#3169)

New Worldline EMV integration using their new REST API.

This new integration replaces the existing Winpos (legacy) integration with Wordline Bambora as the standard Winpos/Worldline EMV solution.

NOTE: The existing Wordline Bambora integration will continue to function with Winpos Mega.

Issues Fixed

- **IDS Import**: Fixed an import problem with IDS. **(#3482)**

- **Reports (Z-day report (92)/Z-day terminal report (152))**: Fixed both reports so that they now run once per currency. **(#3189)**

- **SCO Manager tool**: The 'Cancel receipt' and 'Delete row' functions are now working correctly in the SCO Manager tool. **(#2066)**

- **Self-Service**: Fixed an issue where it was possible to add or scan new articles or customer while the Kiosk was showing the receipt. **(#3048)**

- **Self-Service**: Pressing restart (transaction) in the kiosk now always correctly updates the SCO Manager tool to display Kiosk status as "Standby". **(#3362)**

- **Self-Service**: Fixed an issue with the security element confirmation. The issue resolved was that after having removed the security once for a basket, if another article having the same kind of security was then added to the basket afterwards, the same type of security element confirmation was then required again. **(#3456)**

- **Stock**: Stock functions no longer crash when confirming the lists. **(#3440)**

- **WCI**: The basket command with WCI is now working correctly with the new grid component. **(#3491)**
