## Winpos Mega - Version 1047 SP9 Release

24 March 2025

### Release Notes

Winpos Mega - Version 1047 SP9 Release

24 March 2025

Issues Fixed

Other changes

### Issues Fixed

- **Inventory Groups/Sheets: (#3505)**
  - Fixed an issue with Inventory Sheets when using the Groups option (*Stock.Inventory group = True*) where the 'Quantity in other sheets' column would incorrectly show values, even though there were no other values.
  - Added a 'Re-calculate' button. This can be optionally used before confirmation of a list where there are articles showing as errors in the results. When used this will attempt to correctly re-calculate any articles which are showing as errors in the results window.

	Code	Article code	Description	Start balance	End balance	Difference	Error
1	Articles with errors						
2	200	200	Carslberg 0,33		3 33cl		No active group row
3	28	28	Jauheliha 100g	0,123 kg	13,100 kg	12,977 kg	Sheet counted qty not equal to group total qty
4	28	28	Jauhis tuplarivi	0,000 kg	10,000 kg	0,000 kg	Duplicate counted group row: 10
5	39	39	Pultti A	0,0 kpl	3,0 kpl	3,0 kpl	Sheet counted qty not equal to group total qty
6							
7	Counted articles with difference						
8	Stock quantity will be changed after confirmation						
9	78	78	Varastotuote 1	5,0 kpl	4,0 kpl	-1,0 kpl	
10	48	48	Liitosrengas ABB	0,0 kpl	4,0 kpl	4,0 kpl	
11	49	49	Liitosrengas Laihian metalli	0,0 kpl	5,0 kpl	5,0 kpl	
12	36	36	Tolppaputki	0,0 kpl	2,0 kpl	2,0 kpl

- **POS/REG:** Fixed an issue with scan flags (*Parameters > Settings > Article.Scan flag NN*) and incorrect check digit. This meant that barcodes containing price which started with 20XX would not work correctly in the POS. (#3507)

- **Recipes:** Fixed an issue which caused incorrect quantities in JournalItem. The issues were related to certain PrintInfo values ('To kitchen', 'Partially', 'Article pop-up') in the Article maintenance recipe window being used in combination with setting *Reg.Recipe rows will be included in ecdataserver=True*. **(#3518)**
- **Stock:** Added a 'paste' button to the stock functions to enable data (e.g. Article codes) to be copied from Excel and pasted into the stock function. **(#3484)**
