Release Notes

Winpos Mega - Version 1048 SP1 Release

02 June 2025

Enhancements and Changes

TenantAdmin for Multi-tenant: added language options (#3431)

Added a new option in TenantAdmin to be able to set Language for the Sales Dashboard login page in Multi-tenancy.

When used, this sets or edits the language setting 'Public.Language' on all terminals in the defined database. (If editing, the process is to select language and then 'Save').

Tuudo (Student App) enhancement (#3245)

Added support for automatic discounts with Tuudo in REG.

Change made to existing function button 153 (Tuudo QR) so that 'discount' macros can be set up for different code (student) types in the 'Additional information' field.

e.g. tuudo(PLU:15)tamko(PLU:15;DISC:3:0,1;CUST:21)staff()PLU:xxx

- If student type in QR code is "Tuudo", the executed macro will be **PLU:15**.
- If student type in QR code is "Tamko", the executed macro will be ***PLU:15;DISC:3:0,1;CUST:21***.
- If student type in QR code is "Staff", no macro is executed.
- In any other case (type code not found or no types used), the executed macro will be the last one without parentheses **PLU:***xxx**.

Issues Fixed

- **Backoffice (Fast adjustments)**:

    - Resolved a 'gap' in Fast adjustments functionality for Maintenance > Department/Subdepartment/Article group. Fast adjustments for these now have a new checkbox for setting the 'Article is expired' value on the Article card.

    - Fixed a bug in Fast adjustments where the checkboxes were not working correctly (e.g. checkbox selections were lost/removed). Note: this issue existing in v1048. If a customer uses Fast adjustments/checkbox selections and is using v1048, it is recommended that they upgrade to v1048 SP1.

      (#3381)

- **Backoffice (Peripherals > Kitchen printer)**: Fixed a bug in Kitchen Printer maintenance (Parameters > Peripherals > Kitchen printer tab > Kitchen printer link) where pressing 'Settings' caused a run-time error **(#3704)**

- **Backoffice (Price lists)**: Fixed an issue outstanding from the Vessel-specific price list changes made in v1048 (#3226). Now it is possible from Article maintenance > Price list button to edit the price lists which are listed in parameter *Backoffice.Article pricelist local changes allowed* **(#3719)**

- **Backoffice (Sub-level link pictures)**: Fixed a bug which meant that pictures under sub-level link (Type 5) were displayed incorrectly on the main layout (first layer). **(#3675)**

- **Backoffice ('About Winpos')**: The 'About Winpos' window (Backoffice > Help) now shows the correct DB version with DB version 15 is in use. **(#3721)**

- **Finvoice**:

    - Fixes made so that regular invoices and Finvoice file totals match. **(#3511)**

    - Fixed an issue so that regular invoices and Finvoices with discounts now have the correct totals. **(#3679)**

- **POS/REG (Light version)**: Fixed a bug which caused REG Light-version to crash. Occurred when adding an article with a serial number and then clicking the grid row that the article was added to. **(#3681)**

- **Self-service**: Fixed an issue with 'multiple open hours' functionality (#2988) where the previous day's open hours could affect the following day. **(#3731)**

- **TenantSelect**: Fixed an issue where a Flexcell (grid component) pop-up appeared when starting Back office on Multi-tenant server. **(#3729)**
